Judge Receives Verdict.

The end of the long fought struggle in the senate came early in the afternoon when the vote was taken on the first article of impeachment. With gallery doors locked to prevent the movement of spectators, an unaccustomed hush prevailed throughout the chamber, elevators rose in and pronounced the word "guilty" in almost inaudible tones. The vote of the first charge that Archbald the Erie railroad to sell him the Katy-Did Culm dump at Scranton, resulted in his conviction by a vote of 68 to 5. imposed. Of the ten men who have been impeached before the senate since the organization of government Judge Archbald is the third to be convicted and the only one convicted who appeared to make a personal defense against the charges brought up by the house of representatives.

Had Used Influence.

The first article charged that Judge Archbald had gone to officials of the Erie railroad while that road had a suit pending in the commercial court and had corruptly influenced them to agree to give a favorable option on the Katy-did culm dump, owned in part by the Erie's subsidary company the Hillside coal and iron company. On the fifth charge that he corruptly influenced officials of the Reading railroad to grant a coal land to Frederick Warnke, and had received compensation for this service Judge Archbald received the support of but six senators. On the last article of impeachment, alleging that Judge Archbald had sought credit from attorneys and litigants before him and had carried on a general business in coal land speculations many senators asked to be excused from voting, declaring the charges were so general they could not conscientiously vote either way. The final vote resulted in conviction on this article also, 42 to 20.

Judge Archbald received majorities in his favor on seven of the charges against him, besides the acquittal on the second article where the two-thirds vote against him was not obtained. On the charge that he had wrongfully accepted a purse of \$500 raised among Scranton at torneys, the vote was 65 "not guilty" and one "guilty" the single vote being cast by Senator Ashburst of New Mexico. The music also was of an uplifting character. George of an uplifting character, George has been conducting the properties as a sure you by the belief that people have in him than by the field that he ner, expects to go to Ashland to day to assist Evangelist McKinnel in a revival at that place. Mr. Beekman was formerly associated with the evangelist and it was because of this association and of the great date. sociation and of the great desire Evangelist McKinney that the good people of Northminster church consented most reluctantly for him Rev. Mr. Spoonts lead the music Monday night. but it is probcharge of the choir later on.

on Philip and the Eunuch said in

There came a time in the history of the Early Church when Horod persecuted it and scattered the Church at Jerusalem; as a result Philip went down to Samaria and of the sowing that Jesus did there some time before when he stayed there for a short time as the result of his conversation with the woman at the well.

In the midst of this revival the Spirit of the Lord said unto Philip: 'Arise, and go down toward Gaza", which is desert. He might have agreed that he could not leave so important a work where so many souls were being saved to go into the swearing allegiance to one another most happy manner by various games | desert where there is nothing to be done. But we do not read that he selves or anything we are connected questioned the wisdom of the Lord, with to be caught in the old en-Christian worker to learn.

1. That we must be in commun-

ion with the Holy Spirit if we are him three times in this incident we read that the Spirit of the Lord spoke to him. But you say the Spirit of the Lord does not speak to people now as he did to Philip. If not, then perhaps it is because we are so out of communion with him that I who meet in corners and in private he cannot; or because he knows we rooms and arrange to beat you. The would not obey if he did, and he does not want to add condemnation game cannot be set up. Because all to us by telling us to do something the walls are taken down now and when he knows that we would dis- you are out in the open. If you want bey. The whistle of the steam enthe rattle of machinery, the click of the telegraph and the ring of the telephone has well nigh kind of a setting up, you will not drowned out the voice of Cod.

We may learn the lesson faith. Faith, it has been said, is taking God at His word and asking no questions. Did you ever think what had to have faith that God would care for the great work of grace that was going on there in Samaria and give him equally as important work to do in the desert. He might have said, "Who will care for the new converts here in the city." We must remember there was no organized church as yet. But he believed that the spirit of the Lord who had made them would also care

for them. 3. Obedience. Obedience is but the result of faith. Philip obeyed because he had faith that God would carry on the work there and give him something to do in the desert. There is no better incident of obedience in the Bible than this. When the Lord told Moses to go and deliver the children of Israel out of Egypt he took up two chapters in trying to argue the Lord out of it that he was the one to go; and then the Lord had to perform a miracle before him before he went; but when the Lord said unto Philip "Arise and go; all that there is said about t is," and he arose and went.

4. eal. Philip had zeal; he was on fire with zeal to go God's will, and doubtless that is one of the chief reasons why God revealed His will to him. There is nothing the church needs so much as zeal. There is enough material; it needs to be enkindled. We are fond of quoting "Zeal without knowledge," as if there could be no zeal with knowl edge. Give up zeal with knowledge, but if we can only have one, then, give us zeal; for the one who has zeal will do something and will be given a higher wisdom in doing it than any human knowledge can af-

Success. God never commands to failure. He never told us to be successful, but to be faithful. He did not say, "Well done thou good and successful servant," but well done thou good and faithful servant." His command was not "Be thou successful in life," but "Be thou faithful unto death." If we are faithful God will take care of the

The Queer Chameleon.

There is nothing in the world will induce a chameleon to take even the slightest apparent interest in its sur roundings unless it be the sight of what it considers a toothsome insect. The chameleon's method of taking its prey is very curious, being effected b shooting out an enormously long wormlike tongue, the end of which . clubbed and covered with a visitd so cretion, to which the fasects stick and are thus drawn into its mouth. The actual projection of the tongue is made with marvelous rapidity. The eyes of the chameleon are very curious. They are very large, but, with the exception of a small opening in the center, are covered with skin. They are also entirely independent of each other, with the result that occasionally the creature is looking forward over its nose with one eye, while with the other it is intently watching something directly behind it.

Too Strong.

A young woman from the west who lately has been admitted to the intimacy of "the artistic set" of Washington recently made this query of an artist with reference to the work of a fellow painter:

"Why does Blank stand off and half shut his eyes when he looks at the pic tures he is painting? When I visited his studio the other day he made me do it too."

"The explanation is simple enough," said the other. "Did you ever try to look at them with your eyes wide open? Well, don't; you can't stand it." -New York Press.

whole, probably to morrow. Many Democrats oppose it, but Represent ative Collop of Indiana, who offered the amendment and others, denounce President Taft's executive orders as partisan actions to perpetrate in office Republicans appointed under the "spoils system."

Much Discussion.

Another amendment offered in the committee occasioned a lively discussion. Representative Jackson, Republican, was the author and proposed to bar from mail in "dry" territory letters, pamphlets, newspapers and periodicals containing iquor advertisements and to bar all such matter advertising for sale, stocks or bonds of corporations unless favorably passed upon by the postmaster general. The amendment was lost, after a debate led by Representative Jackson and Representative Hobson of Alabama, supporting the measure, and Representative Moon of Tennessee chairman of the committee opposing it.

Speaking to a point of order against the amendment Representaive Moon said he hoped the point itself would be discussed and not a 'lot of prohibition rot". Mr. Jackon denounced this language as 'cowardly and ungentlemanly." Mr. Moon rep'ied that he would "give the gentleman an opportunity at any time he might desire to repeat his harge outside," and declared that Kansas and the nation were to be congratulated on their defeat of Mr.

Discuss Tariff on Silks. Free rough and dressed lumber

newn and squared timber, shingles, aths and fence posts, retention of practically the present high tariff on the higher grades of silks and reductions in the cheaper silks used by the common people and a penalzing, drastic tariff bar to shut out 'dynamited' silk, were indicated to day as part of the expected Demoratic revision program. The house committee on ways and

means devoted the day to hearings on the wood and silk schedules of the tariff law, and when the testimony and examinations were closed the sentiment favored the inclusion of these provisions possibly together with free meats, in the tentative plan the committee will frame to submit to the extra session of congress. The burden of the testimony of the woolen schedule was a plea for preservation of the present tariff rates. Silk involving immense interests, presented a complexity of technicalities, perhaps greater than n any of the other thirteen schediles of the tariff law.

"Silks," according to Horace B Cheney of South Manchester, Conn. as spokesman of the silk manufactturers of the country, depends upon fashion; if women want anything they will pay the amount necessary

"Women always want something that looks fancy," said C. A. Streuli of New York, waving aloft a hat lining while joining with Samuel Kridel, another importer in protest against the present tariff on velvets, ribbons and other things.

"Silks are a luxury, that is most silks," commented Chairman Underwood, of the committee.

Mr. Underwood outlined his view in which he represents the Democratic majority of the committee that will frame the new schedule. 'We want to get a large amount

of revenue on luxuries," said Mr. Underwood, "so that we can put a ess tax on the necessities of life. Where there is a large percentage of imports we do not want to cut the We are desirous, however, of cutting the rates where no competition and no revenue exist."

MONEY A NATION'S SYMBOL

Its Appearance Reflects the Character of Its People.

The form taken by money in each country is a curiously accurate indication of the character and tastes of the inhabitants thereof, writes James Davenport Whelpley in the Century. The stately English banknote of splendid workmanship and uncompromising severity, the German note with its rude proportions and florid style of finish. the American certificate of most convenient size, perfect workmanship, crispness of design and with the glint of the metal it stands for; the slovenly Italian paper money, dirty, carelessly cut and to be carefully inspected before it is accepted as genuine, and then the beads and shells of the savage.

There is no better illustration of this reflective character than the money of France. Carefully adjusted in size to fit the wallet carried by every careful Frenchman-and all Frenchmen are careful of money-fine of texture, artistic in design and light and delicate in coloring, it possesses a fineness beside which the money of other nations looks cold and brutal. In the same way the French show fineness and subtlety in their manner of living, their loves and hates, their crimes, their politics, their fighting, and even in their trade and manufacturing. They have no real competitors in this.

CURIOUS EPITAPHS.

Quaint Inscriptions or Ancient Tombs In England.

A desperate attempt at an epitaph in the nonconformist Campo Santo in Bunhill fields, where Bunyan, Defoe, the Cromwells and Mrs. Wesiey lie burled, is found on the tomb of Lady Page, a person who seems to have suffered terribly from what we call dropsy, but which might have had another name in those days:

Here Iyes Dame Mary Page, Relict of Sir Gregory Page (Bart.) She departed this life March 11, 1728, In the 56th year of her age.

In 67 months she was tapped 66 times. Had taken away 240 gallons of water Without ever repining at her case Or ever fearing the operation.

A more successful attempt is that found on the tomb of Vavasor Powell. who seems to have suffered eleven years' imprisonment for preaching the gospel. He was known as the "White field of Wales:" In vain oppressors do themselves perplex

WAKENED BY A GHOST.

A Woman's Startling Experience In a Washington Hotel. From his diary under date of Octo-

ber, 1890, Sir Henry Lucy quotes in the Cornhill Magazine a remarkable ghost story which was told to him by a "lady bearing a name highly honored in the United States." The incident happened some years previously The lady was at Washington at a time when congress was sitting and all the hotels were full. On applying for a room at the hotel which she was accustomed to patronize with her husband she was told that the bouse was full. After some little hesitation the clerk, observing her distress, undertook that a room should be got ready for her. It was a small, plainly furnished room on the sixth floor.

She went to bed early and slept soundly until she was awakened by the sensation of a hand touching her face and a voice which cried with piteous accent, "Oh, mother, mother!" She was profoundly startled, but, arguing with herself that it was only a dream, went to sleep again. Again she was awakened by a hand that nervous ly stroked her face and the blood curdling cry. "Oh, mother, mother!" She got up and lighted a candle. A chambermaid came with a startled look. The visitor related her experi

Resting a Model.

Adolphe Mauzel, the German painter, at one time was engaged on a work of mural decoration and kept a man posed in an exceedingly fatiguing position on a scaffold for two hours. The great painter worked away, heedless of his model's discomfort. Finally the victim called down, "Herr Professor, how about the recess?"

Department Has Not Yet Made Ruling-Showmen Would Save Money

Picture theater proprietors are ooking up the question of receiving films by parcels post instead of express. They think it possible that a good deal of expense can be saved in this way. However, speed and centainty of delivery are absolutely certainty of delivery are absolutely and they may find that the mail service is not rapid enough for them. When it is considered that every moving picture show in the United States, except those located in cities where the films are made, is dependent at present upon the express companies for delivery of its daily program, it will be realized that even a slight reduction in shipping expense will amount to probably several million dollars annual

saving to the showmen. The expense of shipping reels is borne entirely by the showman. The film exchanges formerly bore half this burden, but they have abandon-

from St. Lous or Chicago. They are carried by the express companies in specially designed shipping cases. Local theatre managers think the reels can be packed that that each one may be sent in a heavy tin case without exceeding the parcels post limit of eleven pounds. St. Louis and Chicago are in the second zone from Jacksonville, but still the cost of sending the reels by mail would be less by almost half than that of expressing them, proprietors of film shows declare.

It was quite Venetian in effect, for a sort of lagoon came right into the heart of the city, simply jammed with small craft and lined with buildings on both sides. We then rode out to the zoological gardens and spent some time walking through it. It was quite amusing to see the actions of all classes of people when they caught sight of Bobby in his little go-basket. It is so neat and trim (while all English and continental baby carriages are immense, clumsy things), and the baby in his white hood and coat, with bright face and fair hair, made such a contrast to the dark French children that people everywhere stopped, exclaimed, and chattered with each other, smiling and gesturing in true legislators in the project, with the French style. ROOF CATCHES FIRE

"Saturday evening the roof of the residence of Newton Sargent at 350 West Court street caught fire about 6:30 o'clock, burning a small hole. The fire department was called, but a Babcock extinguisher was used by a member of the department in put-

NU MERCURY-NO POTASH

Do you know why so many Specific Blood Poison Victims are also sufferers of stomach trouble or Rheumatism? It is because they have filled their systems with mercury or potash in an effort to cure the blood disorder. These minerals cannot cure Specific Blood Poison; true such treatment will sometimes temporarily remove the outward symptoms and hold the poison in check but as soon as the minerals are left off the disease breaks out again. Any system saturated with mercury or potash is necessarily weakened and loses much of its resistive powers; it is a dangerous treatment and should be left off by any who are using it. There is a way -a certain way-to cure Specific Blood Poison, and that is to cleanse the

blood with S. S. S., madeentirely of roots, herbs and barks. It is a perfectly safe treatment for any one and is certain in its good results. S. S. S. has been recognized formany years as the greatest of all blood purifiers and the safest of treatments for blood poison. Home Treatment Book

OLIVE TABLETS OIL THE BOWELS

A Physician's Substitute for Danger ous Calomel.

When you feel that your liver and bowels need help take Dr. Edwards' Olive Tablets. Substitute for Calomel. Calomel is effective. but dangerous-causing bad after-

Olive Tablets are especially made to take the place of Calomel. Edwards for years has been Calomel's foe. He saw its dangers and its disadvantages in 17 years' practice, treating patients for all kinds of liver and bowel complaints. In his efforts to do without Calomel he developed his now famous little olive-oil-colored tablets. Olive

Tablets are mild but effective. Safe and sure. Pleasant to take but unfailing in results.

Olive Tablets oil the bowels just enough to start nature's own action and they tone up the liver at the same time. They are made from a rare combination of vegetable compounds mixed with olive oil.

If you want to regain that feeling joyous buoyancy and clear thought take Dr. Edwards' Olive Tablets. They work like a vacation 10 and 25c per box.

KEPT AN EYE ON THE HOUSE.

A Neighborly Act That Resulted In Comedy of Errors.

A gentleman and his wife occupying villa in a Loudon suburb a neighbor to "keep an eye on the place' while they were away on their an nual holiday. The neighbor consented and on the first night of his caretaking noticed a light in the bedroom of the presumably unoccupied house and saw the light extinguished.

Accompanied by a policeman, the neighbor made a forcible entrance through the scullery window, and quietly the two men made their way to the bedroom. The light of the constable's bullseye disclosed the head of a man in bed, and the policeman promptly drew his truncheon.

As promptly the occupant of the bed sprang out, and a desperate struggle began. Simultaneously a lady dashed across the room shricking, threw open the window and at considerable peril clambered out. A second constable, passing at the moment, concluded that the lady was bent on suicide and, entering the front garden, held bimself in readiness to catch the woman, who appeared to be about to fling herself to the ground.

The neighbor, however, dragged the lady back into the room, and then the truth began to assert itself. The capfured invader of the empty house and the escaping lady were the occupant and his wife, who had suddenly changed their holiday arrangements without informing their too vigilant neighbor .-London Globe.

FRENCH ZOUAVES.

Fighters Won Their Greatest Fame In the Crimea.

One of the most interesting class of soldiers of modern times has been the French corps called the zouaves. This body of daring and picturesquely at tired fighters reached the heights of its reputation during the Crimean war.

The zouave corps at that time was supposed to consist of Frenchmen. It was, however, quite international. since many daring young foreigners had joined it, and it was known to include in its ranks men from Oxford, Gottingen and other universities. It is probable that a majorify of its members were in it more for love of fighting than for any love of country.

It is not strange, therefore, that its fame as a fighting body should have spread throughout the world. When our war between the states broke out several corps of zouaves, wearing the glittering oriental uniforms of the French corps or a modification of them. were formed on both sides. On the Union side the best known was that corps commanded by Elmer Ellsworth, a young officer from New York and the first killed on the Union side. In the Confederacy the most famous corps of zouaves was that called the "Lou-

isiana Tigers." While in American military life the zouave uniform has practically disappeared, in France the zouave name and uniform still survive.-Harper's

OHIO RIVER STAGE NOW 40.2 FEET AND STILL RISING

Should a 45 Foot Stage be Reached Thousands of Acres of Land Will be Overflowed and Hundreds of Families Driven to the Uplands.

CAFRO, ILL., JAN. 13.—Residents of the towns in the vicinity of Cairo are making preparations to flee with their stock and household effects to the hills, if the Ohio river continues to rise. The river stage tonight was 40.2 feet and the government has predicted a 48-foot stage. Should the river rise to 45 feet, thousands of acres of rich farm land may be inundated and hundreds of families driven from their homes.

The levees at Cairo will resist a 55-foot stage, so the city has little to fear.
